

**Overview**

Year 9 Technology covers Product Design & Make; taught in specialist technical workshops and design rooms. A variety of creative and practical tasks are undertaken to develop the skills required of a designer/maker.

**Term 1**

To kickstart the beginning of the year you will be taking an in depth look at the many different design and drawing skills. We will investigate design through sketching and freehand work along with formal drawing skills encompassing perspective and engineering drawing.

# Year 9 Design & Technology

**Term 3**

In the summer term you will be doing a mixture of small design and make projects using a range materials and STEM challenges.

**Term 2**

This term you will design and make a slot together product. After some initial designing you will create a life size card model, which will act as a template for a plywood version. All parts must come out of one piece of A4 plywood. Parts should slot into position and hold together without any glue.
