

**Overview**

Year 11 GCSE 3D Design — taught in specialist technical workshops and ICT suites. A variety of creative and practical tasks are undertaken to develop the skills required of a designer/maker. This includes design and make projects, focused practical tasks, learning about other artists/designers, drawing, model making, and making products in 3 Dimensions using a range of materials.

**Term 1**

In this term you will be working on a project taken from the exam board sample material to practice working as you will have to for your exam work starting in January. This practice work will be completed as a mock exam.

Year 11 Design & Technology

**Term 3**

All work will be submitted and the course is finished.

Term 2

At the start of the term you will be given an exam question from the exam board which will be based around a title or theme. You will be expected to produce preparation work ready for your exam. Your exam will be a 10 hour practical exam in May
