

### Overview

Year 11 students will fine tune their ability to think about our world in terms of social, economic and environmental issues, along side in depth study of the physical geography of our Earth.

### Term 1

This term students will study our Living World unit, taking a close look at a small scale ecosystem before investigating the fascinating worlds of Tropical Rainforests and Hot Deserts. Students will find out all about life in the Amazon rainforest and the Thar desert, looking at the physical characteristics and how humans interact with these environments.

# Year 11 Geography

### Term 3

As we draw close to final exams it will be time to study our Pre-Release exam materials and practice fieldwork techniques in preparation for Paper 3.

Students will have time to revise, practice skills and ensure they are thoroughly ready for those exams.

### Term 2

Students will also learn about our Changing Economic World, delving into two major case studies on Nigeria and the UK. How does development impact on the lives of individuals, communities and whole countries? We will find out!
